

Enjoy our taste! It is worth to eat even if kept waiting.

味旨拉麵

Since its establishment in 1990, we have developed directly operated shops and franchise shops throughout Japan. The taste that becomes habitable once you eat has been spread not only for Japanese but also overseas for word-of-mouth, and it is very popular for foreign tourists as well. The first overseas franchise shop was opened two years ago.

Currently developing franchise stores in Asian countries, it is very popular with local customers. In the future the brand will also actively develop in the US and Europe. With the thought that "we want Anima ramen to be enjoyed in the whole world", efforts are also being put on product development tailored to the preferences of each country.
